XILUTION INTRODUCES NEW TIME TRACKING CLIENT FOR ANDROID™

Urbandale, IA - January 12, 2010 -- Xilution, Inc. is proud to announce the release of its newest mobile time tracking client Time 2.0 for Android™. Time 2.0 for Android™ was created with professionals in mind. Xilution's newest mobile time tracking client makes it easy to capture time utilization information on the go with one of the hottest mobile computing platforms. Time 2.0 for Android™ is available for immediate download through the Android Market for only 4.99 USD. For more information please visit the following URL.

<http://www.time2dot0.com/Time2dot0Web/remoteClients.html>

Time utilization information captured on Time 2.0 for Android™ can be synchronized with the Time 2.0 Service (www.time2dot0.com). The Time 2.0 Service features powerful reporting and system integration features. It was created for individuals and businesses in need of intuitive, maintenance-free time tracking and reporting. The Time 2.0 Service supports the time tracking and reporting needs of accounting firms, law firms, professional consultants, trade contractors and in-house corporate service organizations.

Xilution, Inc. is an internet technology company based in Urbandale, IA. Xilution was founded in 2002. Xilution launched the Time 2.0 Service (www.time2dot0.com) in August of 2007. In addition to operating the Time 2.0 Service, Xilution has focused on providing it's users with mobile time tracking and reporting options for the iPhone, BlackBerry and mobile web platforms.
